

Complete the following to set up the activity.

- On Vagrant, open a command line and run the following command: `sudo beef`
- When prompted for a password, enter `cybersecurity`.
- This will kick off the BeEF application and return many details about the application to your terminal.
- Along with these details are several URLs that can be used to access to BeEF's User Interface (UI). For example: `UI_URL: http://127.0.0.1:3000/ui/panel`
- To access the BeEF GUI, right-click the first URL and select Open Link.

When the BeEF webpage opens, login with the following credentials:

- Username: `beef`
- Password: `feeb`
